### SUMMARY

Product-minded software engineer with five years of experience shipping frontend-heavy, full-stack products. I turn customer workflows into clear interfaces and reliable systems, owning delivery from discovery to production.

### SKILLS

Frontend

TypeScript

React

Web Components

Svelte

Lit

Design systems

Backend

Node.js

Ruby on Rails

REST APIs

MongoDB

PostgreSQL

Docker

Coolify

### EXPERIENCE

Co-founder / Engineering Lead

February 2026 - Present

VoltAlfa Corporation · Mexico City

Lead a small engineering team building ZapaPOS and an internal developer platform, translating retail workflows into production features with TypeScript, Svelte, Meteor, MongoDB, and Authentik.

Software Solutions Developer

August 2025 - Present

BBVA Mexico · Mexico City

Build reusable Web Components for a corporate leasing platform and contribute to product design, automated testing, exploratory QA, and technical documentation.

Full-stack Developer

October 2024 - August 2025

WAAK Technologies · Mexico City

Built multi-tenant logistics and construction platforms, integrating Wialon for reporting, data visualization, and real-time tracking while supporting stakeholders in production.

Front-end Developer

September 2021 - October 2024

Freelancer · Remote

Delivered and maintained web products with React, Svelte, Astro, PHP, and Node.js, improving performance, accessibility, UX, and deployment reliability.

### PROJECTS

ZapaPOS

TypeScript

Meteor

Svelte

MongoDB

Local-first, multi-tenant POS taken from customer discovery to production for desktop and mobile retail.

Qastor

TypeScript

Desktop

Testing

Open-source desktop app that streamlines exploratory test evidence, screenshots, and debug logs.

Markal

Lit

TypeScript

Astro

WebRTC

Open-source, local-first collaborative calendar using peer-to-peer synchronization.

### EDUCATION

Universidad Autónoma Metropolitana

2019 - 2024

Physics Engineering studies & coursework in Instrumentation and Equipment
